

SQL Advent Calendar

The Productivity Club is tracking members' challenge start dates and wants to calculate each member's focus_end_date, exactly 14 days after their start date....

Question 1: The Productivity Club is tracking members' challenge start dates and wants to calculate each member's focus_end_date, exactly 14 days after their start date. Can you write a query to return the existing table with the focus_end_date column?

```
SELECT
  *,
  DATE(start_date, '+14 days') AS focus_end_date
FROM focus_challenges;
```
