During a quiet evening of reflection, Cindy Lou wants to categorize her tasks based on how peaceful they are....

Question 1: During a quiet evening of reflection, Cindy Lou wants to categorize her tasks based on how peaceful they are. Can you write a query that adds a new column classifying each task as 'Calm' if its noise_level is below 50, and 'Chaotic' otherwise?

```
SELECT
  *,
CASE
  WHEN noise_level <50 THEN 'Calm' ELSE 'Chaotic'
END AS noise_category
FROM evening_tasks;
```
